

Storage Sheds

Homestead
COLLECTION

About Us

Welcome

When you need more room for life - we can help.

Do you need more space? For garden tools, lawn equipment, toys, bikes, boxes and bins... you know, for life? Or maybe you're looking to create an artist's studio, hobby shop, or backyard office shed? Whatever your needs, we're here to help you choose the perfect shed to solve your storage problems.

1 A design that is uniquely yours

Customize your new shed to fit your unique style and needs.

2 Sheds built to last

Invest in a shed that is built with the same grade of construction materials and skilled approach that is used to build a house.

3 Decades of experience

Your perfect shed becomes a reality with the quality that comes from years of experience by multi-generational Amish craftsmen in Lancaster County.

The Homestead Story

Homestead Structures started in 2003 as a sideline business to our dairy farm in order to support our family farm and others in the community. We started with building barns and structures for our Amish brethren, but quickly saw that there was a need and desire in Central PA and beyond for well-made, aesthetically pleasing pool houses, pavilions, garages and other specialty structures.

We are designers, craftsmen, and builders. We specialize in solving your outdoor living needs with quality, unique buildings that reflect attention to detail and craftsmanship. If you have a vision for your new structure, we love helping you bring it to life!

Our Family

Our owner Steve and his wife Martha have nine children, most of which are involved in the family business or farm. Their children have held a variety of jobs, from teachers in a 1-room Amish schoolhouse to apprenticing in the production shop and working as Farm and House Managers to keep the farm running smoothly.

We continue to expand our work family with seasoned craftsmen and builders. Most hail from our local community and many walk to work. Our shop opens at 6:00A and closes up around 5:00P to give our team time to spend with their family every evening.

Our Mission & Vision

We are a family-owned and -operated company, founded on biblical principles. We provide high-quality building solutions that solve our customers' needs, both functionally and aesthetically improving their outdoor living and entertainment spaces.

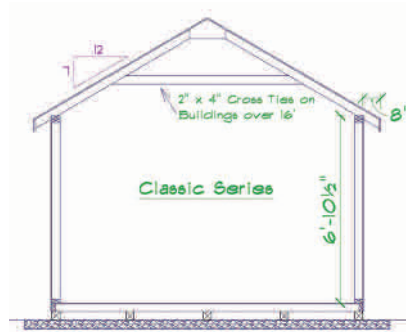

Our vision is to be the company of choice in the industry by providing excellent service to our customers in a God-honoring way.

In-House Design and 3D Drawings are Available

1 **Build a frame at least 2 feet wider than your shed dimensions.**

2 **Fill with gravel or concrete.**

3 **Set shed on top of stone with wooden skid still attached or construct a wood frame or concrete spaces for shed to rest on.**

Foundations

Most sheds will be placed on a gravel bed/pad as a temporary structure. However, a shed must be on a skid, wooden formers, concrete blocks or wavers to keep the wood floor off the gravel.

Permanent and/or larger sheds that hold heavy equipment like tractors and mowers should be placed on a concrete foundation for added support. One of the advantages of using a concrete pad is that the shed won't settle or shift, which can make doors or windows catch or rub as they lose their true lines.

No matter what type of foundation you choose, make sure the ground is compacted, level and has good drainage to eliminate shifting and settling.

Installing a Gravel Pad

First, level your ground in an area at least 2 feet wider than your shed dimensions, so you have a 1-foot border around the outside of your shed. This extra space will prevent dirt from splashing up during rains, help deter pests and rot, and ensure water will drain down and away from the shed floor.

Next, dig down at least 4-6 inches and compact the ground, keeping it level. To ensure a cleaner border, you can install a frame of pressure treated 2x6 wood on a vertical edge. Stake the inside of each corner with 2x2 stakes to secure the frame.

Lastly, fill the base with gravel and level it out. Your shed should either rest on skids, a wood frame, or concrete spacers set out in the gravel.

Ask us about our foundation services!

The Classic Series

FOR ADDED DISTINCTION IN YOUR BACKYARD.
